Professional Summary

Motivated Computer Science undergraduate specializing in Cloud Computing and Full Stack Development with hands-on experience in MERN stack, REST API development, and scalable web applications. Proficient in Java, Python, and AWS with strong problem-solving skills and 200+ DSA problems solved on LeetCode. Seeking software engineering / Full Stack Developer role opportunities to build high-performance applications.

Education

B.Tech in Computer Science Engineering (Cloud Computing & Automation)	2022 - 2026
Vellore Institute of Technology	CGPA : 8.21
12th John Milton Public School	73.4 %
10th St. Andrews Public School	73.5 %

Technical Skills

Languages : Java, Python, JavaScript, SQL

Frontend : React.js, HTML, CSS, Tailwind CSS, Bootstrap

Backend : Node.js, Express.js

Database : MongoDB, MySQL

Tools & Technologies : Git, GitHub, Postman, REST APIs, JWT, CI/CD

Cloud : AWS (EC2, S3, Route53, IAM)

Core Concepts: DSA, OOP, DBMS, OS, CN

Experience

Web Developer Intern

OctaNet Services Pvt. Ltd. (Remote)

Dec 2023 - Jan 2024

- Designed, developed, and deployed REST APIs using Node.js and Express for task creation, updating, deletion, and retrieval, ensuring efficient data handling.
- Conducted code reviews and debugging, improving code quality, readability, and maintainability.
- Managed task allocation and tracked progress using structured workflows, ensuring on-time project delivery. Enforced best practices for version control using CI/CD, Git and GitHub, including branching and pull requests.
- Improved API response time by 30% and user experience through UI optimization and efficient state management.
- Strengthened skills in team collaboration, problem-solving, and Agile model.

Projects

AI Interview, Quiz & Coding Practice Platform (MERN Stack)

[Live Project](#)

- Built a full-stack AI-powered interview platform using MERN stack and Gemini API
- Designed and developed real-time interview question generation and evaluation system
- Implemented secure authentication using JWT and role-based access control
- Reduced API response time by 20% through backend optimization
- Deployed application using Vercel and integrated CI/CD pipelines

Full Stack E-Commerce Web Application

[Link](#)

- Expanded backend APIs using Node.js and Express.js, enabling product management, order processing, and user authentication.
- Applied JWT based authentication system with role-based access control for admin and users.
- Built and integrated MongoDB database schema for efficient storage and retrieval of product and user data.
- Improved a dynamic frontend using React.js with features like product browsing, cart management, and secure checkout flow.
- Integrated razor pay payment and ensured data consistency across transactions.

Certifications

- MERN Full Stack Development – Ethnus
- Postman API Fundamentals Student Expert – Postman
- Blockchain Developer - IBM
- Oracle Foundations Associate

Achievements & Extracurricular

- Solved 200+ DSA problems on LeetCode (Top 15% performance)
- Strengthened problem-solving and algorithmic thinking skills
